Trap is TRIGGERED

Cell Phone RINGS

REMOTE TRAP MONITORING

The WCS Tele-Trap™ Notifier is the most advanced device available for the purpose of notifying the user that a trap of any type has been tripped.

It is easily installed on any trap. When an animal has been captured by tripping the trap, the unit uses an internal cellular phone to place two calls to the user at an interval of five minutes.

The Tele-Trap Notifier is a dependable, rugged, weather-resistant and simple device that can be deployed to nearly any trap with speed and ease.

Benefits

- ▶ Stop Having To Drive Distances For No Reason
- ▶ Save Time And Gas
- ▶ Restricted Access For Neighbors
- ▶ Great For Sensitive Areas
- ▶ No On-Going Monthly Charges
- ▶ Only Pay For Minutes
- ▶ Requires Cell Phone
- ▶ The Most Innovative Remote Trap Monitoring Device

Works With All Types Of Traps, Including The Following:

Safeguard

Havahart

Chimtrap

North Star Science and Technology, LLC
is a premier supplier of satellite transmitters for tracking birds and terrestrial animals.

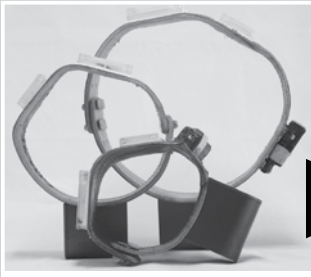

- We make Argos Platform Transmitter Terminals (PTTs) as small as 9.5 grams and GPS PTTs as small as 22 grams.

We offer a full line of battery powered and solar powered PTTs in a wide range of sizes, exclusively for birds. We will start offering harness drop-offs in 2011.

- Our Globalstar GPS tracking collars provide data from the field to the internet in real time. Collars are available in sizes ranging from 400 grams on up (C, 2C, D, and 2D cell battery configurations), with battery lives measured in years.

Our Globalstar tracking system includes a 'non moving' alarm and a geo-fence, along with a mapping application that allows you to plot points in Google Earth™.

Try a demonstration collar for free; just ask us.
